

ROHAN S. SHIRODKAR

Charlotte, NC | 508-863-1357 | rohanshirdkar29@gmail.com | linkedin.com/in/rohanshirdkar

PROFESSIONAL SUMMARY

Results-driven **Sr. .NET Developer / Lead Software Engineer** with over 11 years of enterprise experience designing, developing, and deploying scalable full-stack applications and cloud-native microservices across financial services, real estate, and semiconductor domains. Proven track record in leading high-visibility initiatives—such as mission-critical banking **X9 file processing** and automated workflow systems at **Wells Fargo**—while modernizing legacy architectures from **ASP.NET WebForms (.NET 4.7)** to **.NET 9 / ASP.NET Core** microservices. Highly proficient in **C#, ASP.NET Core, Entity Framework Core, SQL Server, Kafka**, and modern front-end frameworks like **Angular**. Adept at leading Agile development teams, orchestrating CI/CD automated release pipelines (GitHub Actions, Harness, Azure DevOps), and leveraging AI-assisted engineering frameworks to maximize team velocity and software quality.

TECHNICAL SKILLS

- **Programming Languages:** C#, Python, TypeScript, JavaScript, SQL, HTML5, CSS3
- **Frameworks & Core Technologies:** .NET 9 / .NET Core, ASP.NET Core, ASP.NET MVC, Web API, Razor Pages, Entity Framework Core (EF Core), Angular, Node.js, WPF, WCF, Kafka (Pub/Sub), RESTful APIs, LINQ
- **Databases & Data Processing:** MS SQL Server, PostgreSQL, MySQL, X9 File Format Specification Processing (FileWeasel), JSON, XML
- **Cloud Services & DevOps:** Azure DevOps, Azure App Services, Azure SQL Database, GitHub Actions, Harness CI/CD, Git, SFTP, Snyk, SonarQube, Postman, Swagger, Visual Studio, VS Code
- **Testing & Quality Assurance:** xUnit, NUnit, Playwright (Automated E2E Testing), Code Reviews, TDD
- **AI Tools & Frameworks:** GitHub Copilot, Prompt Engineering, RAG (Retrieval-Augmented Generation), Agentic AI, MCP Integrations, Tachyon Agent Platform
- **Methodologies & Architecture:** Microservices Architecture, Event-Driven Architecture, SOLID Principles, Agile/Scrum, JIRA, Confluence, System Design

PROFESSIONAL EXPERIENCE

Wells Fargo

Sr. .NET Developer / Lead Software Engineer

Charlotte, NC

June 2024 – Present

- **Led the architecture and execution of the X9 Integration Project** for the enterprise Liens, Levies, and Garnishments (LLG) platform, leveraging FileWeasel parsing libraries and custom .NET console drivers to parse, ingest, and process critical banking X9 files directly into automated release and payout workflows.
- **Engineered an automated "Take Next" case assignment engine**, replacing manual LLG case routing with an automated, load-balanced workflow algorithm based on processor capacity and expertise, significantly reducing manual overhead and processing bottlenecks.
- **Spearheaded application modernization efforts**, migrating legacy ASP.NET WebForms (.NET 4.7 / EF6) systems to cloud-native microservices using .NET 9, ASP.NET Core 9, EF Core 9, and Razor Pages.
- **Served as Lead Developer for a client-side engineering team of 5 contractors**, managing daily cadences, code reviews, monthly governance metrics, 1-on-1 development sessions, and technical presentations to executive leadership.
- **Established modern CI/CD pipelines** for GitHub SaaS modernization, authoring GitHub Actions workflows and Harness release automations to streamline builds and accelerate release turnarounds.
- **Architected event-driven components using Kafka pub-sub topics** and optimized complex SQL Server stored procedures, indexes, and queries, accelerating database transaction execution times under high enterprise workloads.
- **Integrated advanced AI engineering workflows** (GitHub Copilot, custom RAG frameworks, Devin.ai, and Wells Fargo's Tachyon agent platform) into daily software development cycles to streamline unit testing, planning, and code generation while adhering to enterprise AI governance standards.
- **Elevated code reliability and test coverage** by building comprehensive unit/integration test suites using xUnit and NUnit, along with automated end-to-end browser test scripts using Playwright.

TCC CBRE Group
Sr. Software Engineer

Dallas, TX
April 2022 – May 2024

- **Designed, developed, and deployed enterprise full-stack web applications** utilizing C#, ASP.NET MVC, RESTful Web APIs, and Angular (with Kendo UI) for commercial real estate investment and property management operations.
- **Developed server-side API logic and background job schedulers** using Node.js, ASP.NET Web API, and Hangfire CRON automation to process high-volume HTTP requests and external system integrations.
- **Architected and managed cloud infrastructure in Microsoft Azure**, utilizing Azure App Services, Azure SQL Database, Application Insights, and Azure Monitor for reliable performance tracking and logging.
- **Automated software releases by configuring Azure DevOps CI/CD pipelines**, enabling seamless deployment cycles across multi-environment staging and production builds.
- **Executed key external API integrations** with third-party software including Coupa procurement and Giraffe platforms, while conducting generative AI proof-of-concept (POC) builds with the OpenAI API.
- **Enforced static security analysis and quality benchmarks** using SonarQube, Snyk, and Swagger, while providing technical mentorship and knowledge transfer (KT) to onboarding developers.

Discovery Semiconductors Inc.
Sr. Software Developer

Ewing, NJ
January 2019 – March 2022

- **Led software development for clean-room testing and optical device control** using C# .NET Core, WinForms, and ASP.NET MVC, ensuring robust test automation and data acquisition.
- **Developed high-performance instrument drivers and asynchronous event-driven algorithms** using C# .NET, optimizing real-time device control and laboratory data capture.
- **Built RESTful Web APIs and integrated Entity Framework with LINQ** to perform high-speed CRUD operations against MS SQL Server databases.
- **Configured and deployed virtual machines and web APIs in Azure**, setting up Azure DevOps repositories, board tracking, and release pipelines.

Discovery Semiconductors Inc. (Continued)
Software Developer

Ewing, NJ
February 2017 – January 2019

- **Engineered custom Python automation libraries** (utilizing NumPy, Pandas, pyVISA, and pySerial) for remote instrument virtualization, real-time control, and data visualization.
- **Designed relational database schemas in PostgreSQL**, writing optimized SQL queries, triggers, and PHP server-side communication scripts for lab data tracking.

Discovery Semiconductors Inc. (Continued)
Application Developer

Ewing, NJ
September 2016 – February 2017

- **Developed responsive web interfaces** for order processing and customer support using HTML5, CSS3, JavaScript, Bootstrap, and PHP backed by MS SQL Server.

SMAST at University of Massachusetts Dartmouth
Web Application Developer

Dartmouth, MA
July 2015 – May 2016

- **Developed interactive marine research web applications** utilizing JavaScript, Mapbox API, and D3.js to map and visualize species location data backed by MS SQL Server and PHP.

EDUCATION

Master of Science (M.S.) in Computer and Information Science
University of Massachusetts Dartmouth | 2014 – 2016

Bachelor of Engineering (B.E.) in Information Technology
University of Mumbai | 2010 – 2014

CERTIFICATIONS & CONTINUOUS LEARNING

- **Certified Scrum Master (CSM)** – Scrum Alliance

- **Generative AI & LLM Engineering:** Hands-on certifications and continuous upskilling in Agentic AI, RAG (Retrieval-Augmented Generation) Architecture, and Claude Fundamentals.
